-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2829

1. Applicant's election of species of figures 1A-1B in Paper No. 12 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 7-9, 11-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 12.

3. Claims 1-6 and 10 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claim 1, it is unclear which devices are used for performing the steps of "forming a measured value for the reference voltage that is ...", "varying one of the reference voltage...", "buffering the voltage values present...", "forming an average value..." and "setting the reference voltage..." as recited in claim 1, "the steps of "performing the varying step..." as recited in claim 2, the step of "performing the switching and varying..." as recited in claim 3, the step of "incrementally varying the external comparison voltage" as recited in claim 4, the steps of "incrementally varying the external comparison voltage" and "assuming the two switched states..." as recited in claims 5-6 and all steps as recited in claim 10.

Furthermore, it appears that the specification does not have support for these sequent steps as recited in claims 1 and 10.

4. Claims 1-6 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 10, it is unclear what "a software control", "a set point voltage value" represent. Furthermore, it is unclear what is meant by "buffering the voltage values present for each switched state of the commutator...".

The dependent claims not specifically address share the same indefiniteness as they depend from rejected base claims.

5. The references cited on the PTO-1449 have not been considered by Examiner since they do not have English translations. It is necessary that Applicants provide English translations for these documents.

6. Since claims are indefinite, no art has been applied to these claims.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Krause (pat # 6,313,655) disclose semiconductor component and method for testing and operating a semiconductor component.

O'Toole et al (Pat # 5,212,442) disclose forced substrate test mode for packaged integrated circuits.

Art Unit: 2829

Miller et al (Pat # 6,163,867) disclose input-output pad testing using bi-directional pads.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to VINH P. NGUYEN whose telephone number is (703) 305-4914.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-4900.
